CREATING A RESEARCH POSTER

STUDENT GUIDE

Procedure for Poster Submission

View deadlines and symposium instructions for poster presentations here:

twu.edu/research/student-creative-arts-and-research-symposium

IMPORTANT:

Only one print per presentation is funded by Office of Research and Sponsored Programs. Proof your poster carefully.

POSTER PRINTING

Denton Campus - Faculty Commons:

Submit your poster print request at twu.edu/faculty-commons/services/printing-and-design/ You will receive an email notification when your poster is ready.

Denton poster pick up: outside the door of Stoddard 306, Monday-Friday, 7am - 6pm.

Dallas Campus - Jared Vernon, IT Solutions

For Dallas campus pick up, submit a ticket on the [Dallas Campus form](#). For questions, contact Jared Vernon via email at jvernon@twu.edu.

For more information, visit [Student Creative Arts & Research Symposium](#) website or contact your instructor or Tracy Lindsay, 940.898.3377 or tlindsay@twu.edu in the Office of Research and Sponsored Programs.

CREATING YOUR POSTER

Visit twu.edu/faculty-commons/services/printing-and-design/ and scroll to the Research Poster Templates accordion.

The presentation will open in Google Slides.

To download for **PowerPoint**, select File > Download .pptx. To use **Google Slides**, choose File > Make a Copy. You can then delete the yellow textbox to begin creating your poster.

The standard sizes for TWU poster sessions is **44x56**.

Think of this slide as the sheet of paper that will be your poster, and arrange all the elements as you would like them to appear on the final print.

You can design your poster any way you like (keep the TWU branded banner and use maroon headings). The template gives you a good starting point. Text boxes and columns in the template can be moved how you would like them.

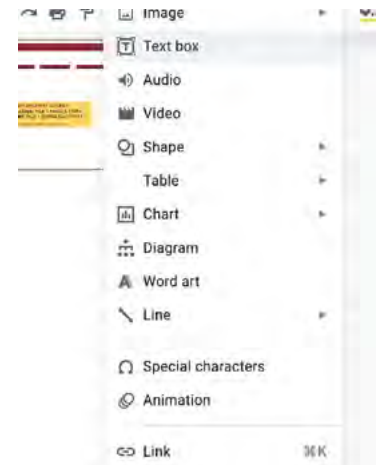

Add Content

Click **Insert > Text Box**.

Now click and drag the mouse over the area you would like insert text into. This will create a dashed box that you type into. Click outside the box when you are finished entering text.

Font Size: keep your text size as large as possible for your amount of content but recommended font sizes are 24 pt. for your Body and 36 pt. for your Headlines.

Resizing Images

Select the picture you'd like to resize by clicking on it in PowerPoint. Using your mouse, click and drag a corner handle, while holding shift, so that it constrains proportions.

Best practices for using photos on your poster:

Images saved from the web are generally too low resolution for printing. Printing requires a high resolution image, preferably 300dpi or more. Images should never be enlarged more than their original size. This will result in pixilation and blurriness. For best results, choose large photos that are high resolution.

Look for free royalty-free stock photos here:

thestocks.im | pexels.com | unsplash.com | stocksnap.io | freeimages.com

QR Codes

You can create free QR Codes at QRcodecreator.com

Be sure to put in the entire url including *https://*

Replace any existing QR codes on the template with your new code.

Searching the web for images may result in using **copyrighted images** without permission or low quality images.

If you do use Google search, it is best to set search filters:

- 1- Enter your search term and go to the Images tab
- 2- Click the Tools button
- 3- Set Size to Large
- 4- Set Usage Rights to "non-commercial reuse"
